

InterSystems Solutions for Financial Services

Unified Data has the Power to Transform

In the fast-moving financial services industry, where timeliness and precision are paramount, InterSystems technology is a catalyst for transformation.

InterSystems data management technology unlocks data trapped in silos across your enterprise, simplifying your architecture in a non-disruptive way to deliver performance where it matters most. This enables financial services firms to transform at scale, so they can increase customer satisfaction, adopt generative AI, maintain compliance, grow revenue, and optimize efficiency. With an unwavering focus on customer success, we empower banks, asset managers, insurers, fintechs, and data providers to unlock new possibilities.

A Platform Designed for Performance

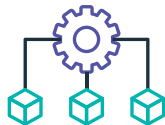

2 Billion Trades per Day

2 billion real-time stock trades executed every day amidst unprecedented market volatility

9X Faster

9x faster than a leading data platform in a side-by-side comparison

30% Less Infrastructure

All the components needed to create a smart data fabric, using 30% less infrastructure than a leading data platform

Supporting the Evolution of a Data-Driven Industry

Retail Banks and Commercial Banks

InterSystems fuels innovation in retail and commercial banking to power digital customer experiences and generative AI initiatives, automate processes, optimize regulatory reporting, and minimize risk.

Investment Banks

InterSystems keeps capital markets running with a modern, high-performance, cloud-first solution to power mission-critical applications built on unified data.

Asset Management

InterSystems enables better business outcomes with easier access to data, supporting better investment decisions, improved risk management, adherence to compliance requirements, and cost reduction.

Insurance Firms

InterSystems transforms operations with unified data and automation that enable business leaders to manage risk, detect fraud, achieve customer personalization, and process claims faster.

Fintechs and Data Providers

InterSystems supports product innovation with a platform designed for performance, scalability, and improving operational efficiency.

Unlocking the True Potential of Enterprise Data

Dubbed “the future of data management” by Gartner[®], an enterprise data fabric is a new architectural approach that speeds and simplifies access to data assets across data lakes, data warehouses, data clouds, data lakehouses, applications, documents, and other sources. InterSystems takes this approach further by embedding a wide range of machine learning and AI-enabled capabilities that make it faster and easier for financial services firms to gain new insights and enhance predictive or prescriptive analytics (a smart data fabric).

Designed For Flexibility and Scalability

Our solution suite is designed to tailor to client needs. Whether you're building a data-intensive application, or want to simplify data management, InterSystems can help.

InterSystems IRIS

InterSystems IRIS® is a high-performance data platform designed to make it easy to build applications that support mission-critical processes by connecting live data across disparate systems and silos.

InterSystems Data Fabric Studio

InterSystems® Data Fabric Studio™ is a fully managed solution that streamlines access to data across silos via self-service cloud software, delivering a single source of trusted data to all consumers.

InterSystems TotalView For Asset Management

InterSystems TotalView™ For Asset Management is tailor-made to simplify access to all enterprise data for asset managers, without the need for developer resources.

Powering Innovation, Transformation, and Efficiency

Digital Transformation

Achieve digital transformation with a next-generation data platform designed for speed, accuracy, and reliability.

Investment Operations

Power your mission-critical trading operations with a high-performance data platform designed for low-latency and high-throughput.

Risk Management and Compliance

Feed risk analytics with live and historical data for more precise risk management. Eliminate errors in compliance reports and streamline operations with automated workflows and processes.

Client 360

Achieve customer personalization with predictive analytics built on high-quality, integrated data from all of your enterprise and external data sources.

On-Demand Reporting

Unify disparate data sources to create accurate and timely client, regulatory, operational reporting on demand.

Product Innovation and AI

Innovate and thrive on a platform designed to power digital experiences, self-service reporting, and generative AI.

Cloud Fintech Gateway

Integrate innovative fintech solutions with client production applications using a real-time, bidirectional gateway.

“OUR MISSION IS TO HELP MEMBERS IMPROVE THEIR FINANCIAL LIVES. THE USE OF INTERSYSTEMS PRODUCTS ALLOWS US TO BETTER UNDERSTAND OUR MEMBERSHIP THROUGH THE USE OF DATA ANALYTICS.”

Supporting Innovation in Financial Services for Decades

Singularly Focused on Client Success

Harris Associates

Asset management firm improves business performance with InterSystems TotalView For Asset Management

Broadridge Financial Solutions

Fintech uses a smart data fabric architecture to unlock value from distributed data assets

Financial Center First Credit Union

Financial center banks on analytics application to build stronger member relationships during the COVID-19 pandemic

Rathbones

Rathbones uses InterSystems to deliver scalability, reliability, and high performance to support rapid growth

Why InterSystems?

InterSystems is a leader in data management technology used by thousands of clients globally to build and run mission-critical, data-intensive applications. Banks, asset managers, and financial technology firms rely on InterSystems to run trade order management systems, wealth management platforms, regulatory reporting engines, business reporting, and many other use cases.

InterSystems is recognized as the sole Challenger in the 2023 Gartner® Magic Quadrant™ for Cloud Database Management Systems, a Strong Performer in The Forrester Wave™: Enterprise Data Fabric, Q1 2024, and as an Exemplary Vendor in the Ventana Research Data Platforms Value Index 2023.

InterSystems is committed to excellence through its award-winning, 24/7 support for customers and partners in more than 80 countries.
