

Enable More Resilient, Flexible, and Transparent Supply Chains with InterSystems

InterSystems, one of the world's most trusted data management platform providers, is expanding its partnership ecosystem to bring innovation to supply chain management.

In the face of constant change, disruption, and opportunity, organizations need a streamlined source of unified and reliable data that is available in real-time. InterSystems Supply Chain Orchestrator eliminates the data challenges that organizations encounter on their path to insight-driven performance across their entire supply chain. Empower your supply chain application ecosystem by leveraging a centralized data platform that acts as a connective tissue, enabling seamless integration of diverse data sources, and real-time detection of disruptions and opportunities. This unified approach provides a comprehensive view of your organization's supply chain data, resulting in one reality.

Consistent Data

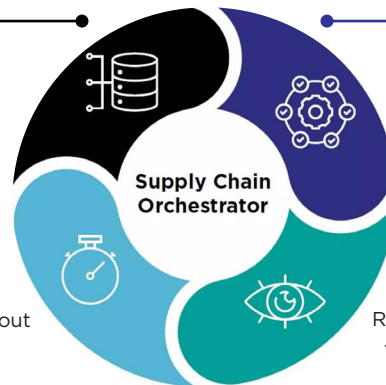

Multi-Model DBMS

Harmonize and normalize disparate sources and formats - relational, non-relational, streaming, etc. for consistent and accurate data representation

Real-Time Data and Analytics

Multi-Workload DBMS

Ingest, process, and analyze data in real time without delay and at scale, without moving or copying the data for analysis

Intelligent Processes

Interoperability

Enable seamless, accurate, connected supply chain orchestration and AI-enabled intelligent business processes

Actionable Insights

Advanced Analytics

Real-time advanced analytics - BI, ML, AI, NLP - for descriptive, predictive, and prescriptive insights in the moment

Benefits of Partnering with InterSystems

Partnering with InterSystems is a strategic move to not only improve service delivery and develop new products, but also to increase bottom-up innovation, improve operational efficiency and provide business process agility for long term growth.

Enhanced Product Offerings:	Integrating your solutions with InterSystems technologies can not only offer the opportunity for enriched product features and capabilities, but also it can ultimately lead to the development of scalable new products and services expanding your existing customer base.
Market Expansion:	Collaboration with InterSystems can open up new markets and customer segments, leveraging the established InterSystems reputation and customer base. Over 1,200 partner organizations already work with InterSystems. We create value together, not just for a few years, but for decades.
Operational Efficiency:	Partners can benefit from InterSystems expertise in technical areas including data management, cloud deployment, machine learning and AI, which can help reduce deployment time and improve overall performance, scalability and innovation.
Cloud-first:	As a complete, cloud-first data platform, it eliminates the need to integrate multiple technologies, resulting in less code, fewer system resources, less maintenance, and higher ROI for long-term success.
Proven Technology:	InterSystems technologies make it easier to build high-performance, machine learning-enabled applications that connect data and application silos. It provides data acquisition in real-time, using smart data fabric architecture.

Partnership Opportunities

Systems Integrator Partner

Planning, implementing, coordinating, testing, improving and maintaining business application systems based on InterSystems technology.

Solution Partner

For partners that provide enterprise applications or solutions built on InterSystems technology.

Technology Alliance Partner

Hybrid cloud professional and managed service suppliers that deliver a solution based on InterSystems technology to supply chain and logistics customers.

InterSystems Start Up Program

InterSystems supports data driven startups in supply chain.

“When it comes to the foundation for our solutions, we not only need a data platform that can **quickly and reliably store, cleanse, and analyze vast amounts of data** that’s updated every second in various formats – it also has to let us integrate functions that support the BI capability of our products, deliver a wide range of technologies, and always be up to date in terms of security. **InterSystems gives us all this in one platform.**”

Dr. Michael Schiffmann, Managing Director –
Update Texware GmbH

About InterSystems

Established in 1978, InterSystems is the leading provider of next-generation solutions for enterprise digital transformations in the healthcare, finance, manufacturing, retail, consumer goods, logistics and distribution sectors. Organizations depend on InterSystems Supply Chain Orchestrator to integrate and complement their existing supply chain applications and IT infrastructure to provide real-time, intelligent, actionable insights into supply chain disruptions, and accelerate time to value.

InterSystems cloud-first data platforms solve interoperability, speed, and scalability problems for large organizations around the globe. InterSystems is committed to excellence through its award-winning, 24/7 support for customers and partners in more than 80 countries. Privately held and headquartered in Cambridge, Massachusetts, InterSystems has 36 offices worldwide.
